Bandung, West Java, Indonesia

PROFESSIONAL SUMMARY

Final-year Telecommunications Engineering student at Telkom University (GPA: 3.58/4.00) specializing in Cloud Infrastructure, CI/CD Automation, and DevSecOps. Certified in Huawei HCIA (Cloud & Datacom) and Cisco CCNA, with hands-on enterprise experience as a DevOps Engineer Intern. Proven track record in delivering end-to-end solutions, including centralized observability (Grafana, Prometheus), Docker/Kubernetes orchestration, and comprehensive application security & load testing (OWASP Top 10, k6). Beyond technical depth, I possess strong organizational leadership—having managed operational budgets of IDR 21.6M and mentored engineering teams. I am eager to leverage my blend of robust technical capability and analytical skills to build scalable, secure, and resilient systems in a high-impact Cloud or DevOps engineering role.

EDUCATION

Telkom University — Bandung, West Java, Indonesia <i>Bachelor of Science, Telecommunications Engineering GPA: 3.58 / 4.00</i>	Sep 2023 – Sep 2027 (Expected)
---	--------------------------------

- Learn core telecommunications concepts including signal transmission methods, network architecture, and information signal processing to drive innovation in the field
- Configured and operated telecommunications devices and systems across wired, wireless, and cloud-based network environments
- Analyzed and resolved complex problems in telecommunications systems through applied research and laboratory work
- Performed optimization of telecommunications devices and technologies, including hands-on experience with modern infrastructure such as Kubernetes, Docker, and 5G networks

WORK EXPERIENCE

PT Teknologi Nirmala Olah Daya Informasi — Techno Infinity (Proxisis & Co.) <i>DevOps Engineer Intern</i>	Jun 2026 – Sep 2026
---	---------------------

- Infrastructure Observability & CI/CD: Engineered a centralized monitoring and observability stack for production Linux servers using Grafana, Prometheus, Node Exporter, and Grafana Alloy, integrated with real-time Telegram alerting. Automated deployment workflows by establishing Jenkins CI/CD pipelines and Docker containerization.
- Server Hardening & Cloud Security: Executed robust infrastructure security measures by configuring UFW, SSH, and Fail2Ban for automated intrusion prevention. Conducted comprehensive server audits using Lynis, successfully increasing the enterprise hardening index score from 59 to 80+. Configured Nginx Reverse Proxy and ModSecurity WAF.
- Performance Engineering (Load Testing): Spearheaded enterprise-grade load testing on staging SaaS applications (ISS Indonesia) using Grafana k6. Simulated high-load scenarios up to 975 concurrent Virtual Users (VU), identifying and resolving system bottlenecks (e.g., ulimit configurations, socket limits).
- Application Security Testing (Pentesting): Conducted deep-dive vulnerability assessments and manual security testing aligned with OWASP Top 10 methodologies using Burp Suite. Discovered and reported critical issues regarding session management, Broken Access Control (RBAC/IDOR), and SSO token replays, providing actionable mitigation strategies to the executive board.

EXPERIENCE

BluAmbassador Regional Bandung Batch 2 — Blu by BCA Digital <i>Brand Ambassador</i>	Jun 2026 - Present
---	--------------------

- Represent blu by BCA Digital as campus brand ambassador in Bandung region, driving product awareness and user engagement among university students
- Participate in exclusive skill-development workshops including Content Creator Class and Public Speaking Class facilitated by BCA Digital
- Engage in structured ambassador program activities including company visit to BCA Digital headquarters and performance-based incentive program

Adaptive Network Laboratory (ANL) — Telkom University <i>Research Assistant</i>	Sep 2023 – Present
---	--------------------

- Contributed to Cloud Native and Kubernetes/5G infrastructure research, supporting cross-lab collaboration and scientific paper publications
- Maintained research documentation including technical guides and experiment reports to ensure quality and reproducibility of findings
- Participated in industry visit to CTI Group Jakarta, gaining exposure to enterprise-scale project operations and technology deployment

Adaptive Network Laboratory (ANL) — Telkom University

Jun 2025 – Present

Head Treasurer

- Manage and oversee laboratory operational budgets of IDR 21,6M for all event, preparing financial proposals (RAK/RAB) per division in compliance with SOW regulations
- Produce structured financial reports after each event, tracking actual expenditures against approved budgets to ensure transparency and fiscal accountability
- Coordinate budget allocation across multiple divisions, ensuring all spending aligns with laboratory financial governance policies

Adaptive Network Laboratory (ANL) — NetDevelopment

Jan 2025 – Mar 2026

Mentor & Head Coordinator

- Served as Head Coordinator (2026) overseeing guided learning sessions for research assistant recruitment program, coordinating Docker (Adinusa) and Django (Udemy) modules for new participants
- Mentored participants in Cloud & infrastructure topics, including paper review sessions focused on Cloud Native architecture and modern network management
- Guided Final Project teams in two tracks: (1) Apotek Web Development — full-stack web app using Django and Docker; (2) SDN Network Management System — website monitoring using Grafana and Prometheus
- Evaluated participant deliverables and provided structured technical feedback to ensure project quality and learning outcomes

Adaptive Network Laboratory (ANL) — NetSchool Bootcamp

Oct 2024 – Jan 2026

Python Instructor & Mentor

- Delivered Python programming sessions to bootcamp participants, covering fundamentals through applied topics including data visualization and network simulation
- Guided participants in understanding Python implementation for telecommunications and networking use cases through hands-on exercises

Adaptive Network Laboratory (ANL) — Telkom University

Jul 2024 – Jun 2025

People Division Member

- Coordinated and executed 5 internal organizational events (NetClass, NetNongkrong, Farewell Party, Makrab, Sertijab) for a community of 55 members, managing end-to-end logistics, scheduling, and documentation
- Served as MC for Open Mind ANL 2024 and Closing Netschool ANL 2024, ensuring smooth event execution and professional audience engagement
- Managed programs supporting collaborative work culture and professional development across all laboratory members

AIIESEC — Future Leaders Summer Peak (AFL 2024)

Feb – Jun 2024

Program Participant & PIC (Person-In-Charge), Final Project

- Completed a structured 5-month leadership program centered on SDG 8 (Decent Work & Economic Growth), covering goal-setting, social impact strategy, and cross-cultural collaboration
- Led a 10-member team as PIC for the graduation Final Project: developed a product revitalization case study for an outdated F&B concept, proposing a market re-entry strategy and innovation roadmap
- Designed and delivered full project documentation in Notion ahead of deadline, including: phased rollout plan, team roles & RACI, and a timeline & goals dashboard
- Directed team coordination across all project phases — ideation, research, methodology design, and final presentation — ensuring on-time delivery of all milestones

Adaptive Network Laboratory (ANL) — NetDevelopment

Jan – Jun 2024

Participant

- Reviewed international research papers on Software-Defined Networking (SDN) and Named Data Networking (NDN), developing technical analytical skills
- Participated in guided learning for Docker (containerization) and Django (web development), completing hands-on practical exercises
- Developed and deployed a web application using Django and Docker as Final Project — awarded Best Project Team

SEARCH Telkom University

Oct – Nov 2023

Webinar Committee — Documentation & Publication Department

- Organized 2 educational webinars with combined attendance of 200+ participants, managing all documentation and event records
- Supported social media campaign that contributed to a 12% increase in event attendance through coordinated content and documentation
- Developed communication strategies and managed promotional materials that improved media coverage by up to 12%, including visual content creation and copywriting for event campaigns

SKILLS

Hard Skills:

- Linux Server Administration
- Docker
- Kubernetes
- Jenkins CI/CD
- Git
- Python
- Bash Scripting
- OWASP Top 10 Methodologies
- Vulnerability Assessment (Burp Suite)
- Enterprise Server Hardening (Lynis, Fail2Ban, UFW)
- Web Application Firewall (ModSecurity, Cloudflare)
- Centralized Monitoring (Grafana, Prometheus)
- Performance & Load Testing (Grafana k6)
- Network Routing & Switching.

Soft Skills:

- Cross-Functional
- Team Leadership
- Agile/Scrum Methodologies
- Project Budgeting & Resource Allocation
- Technical Documentation
- Critical Thinking
- Problem Solving
- Mentoring
- Time Management
- Integrity
